

DR. RHONDA K. SPENCER-HWANG

Professor

Dear Neighbors,

Let's build a thriving, healthy Loma Linda! I'm running for City Council District 4, because I am passionate about creating a thriving community for all. As a 22-year resident, wife to Joe, and mother of three (my youngest enrolled at Bryn Mawr Elementary), Loma Linda is my home.

My vision prioritizes public health, local businesses, and tackling issues like homelessness and transportation. Together, we can preserve Loma Linda's unique character while fostering a vibrant future.

As a Professor of Public Health and author of "Raising Resilient Kids," I have several years of research on longevity in our city. I'm inspired by our city's centenarians because they offer insights for building healthy communities. I'm eager to use this expertise by developing practical initiatives that improve our city.

As City Council Member, I will:

- Listen to residents: Conduct surveys and town halls to identify opportunities for improvement and solutions.
- Secure funding: Seek grants for initiatives like preserving open spaces, parks, and trails.
- Enhance infrastructure: Improve sidewalks, roads, and street lighting for a safer, runner-, biker-, and walker-friendly community.
- Boost economy: Encourage smart economic growth that supports businesses and public health.

With your support, we can build a healthier, more prosperous Loma Linda for all.
